

Executive Brief

Investor overview

LexiCo AS is a Norwegian software company building infrastructure for trustworthy AI. Three proprietary technologies — O(1) memory architecture, the STONE compression engine, and TSP (Trust Standard Protocol) — together solve the three biggest structural problems in large language model deployment: cost, latency variability, and verifiability.

KEY FACTS

- Founded in 2024 in Norway (reg. no. 937 155 344)
- 8 products — LexiSaaS, LexiDev Tools, TSP, LDC, LexiAI Kurs, LexiAgent, Audit and consulting
- LexiAgent and TSP are live in production; LDC has shipped
- Dutch Stichting governance with ethical veto rights
- Reviewed by Simula Research Laboratory and NTNU

CORE TECHNOLOGY

- O(1) Proxy — constant response time regardless of input size
- STONE — up to 79% fewer tokens with meaning preserved
- TSP — cryptographic trust envelope (Ed25519 + RFC 3161) for every AI response

We are seeking strategic partners for European and global expansion.
