LexiCo AS — Fact Sheet

About the company

LexiCo AS is a Norwegian technology company developing proprietary infrastructure for efficient, sustainable and secure use of large language models (LLMs). The core technology is the STONE compression engine, the O(1) AI proxy, and Trust Standard Protocol (TSP) for cryptographic signing of AI responses.

Key facts

• Founded: 2024

• Headquarters: Nøtterøy, Norway

• Company reg. no.: 937 155 344

• CEO: Hans Berge

• CTO: Julian Andersen Berge

• Website: https://lexico.no

• Press contact: presse@lexico.no

Products

• LexiSaaS Proxy — drop-in OpenAI-compatible AI proxy with STONE compression

• Lexi Desktop Command (LDC) — local AI execution with no data leakage

• LexiAgent — agent network for distribution (20% commission of the invoiced amount)

• Lexi Academy — competence on the EU AI Act and AI regulation

Technology

• STONE compression reduces token costs for enterprise AI usage

• The O(1) Proxy delivers constant response time regardless of context length

• TSP signs every AI response with cryptographic proof (Ed25519 + RFC 3161) for the EU AI Act

• Nordic-hosted, GDPR-compliant and auditable AI usage

• Full methodology: https://lexico.no/benchmarks

Market

Norwegian and Nordic companies in finance, public sector, consulting and technology. Focused on customers with requirements for data residency, compliance and cost control.
